*“Construction Solutions for the Future”*

## MISSION STATEMENT

*To provide quality construction services at competitive rates while honoring Jesus Christ in our approach to diligently serve our clients in attaining their goals and aspirations.*

## Project Highlights

Titan Construction and Engineering was fortunate to serve as the Design/Build General contractor for (2) projects recently in northern Indiana.

The first project was the 54,000 sf, 5th phase of a warehousing facility for Knox Fertilizer bringing the total overall size of this warehouse facility to over 200,000 sf. Knox Fertilizer has been a client of Titan C&E for over 25 years and produces granular plant and turf fertilizing products distributed through a wide network of suppliers under many well-known brand names.

The second project was a 49,000 sf production/warehouse/office facility for Ramco Supply in Rochester. This was the first Design/Build project for Titan C&E with Ramco Supply who manufactures and supplies metal roofing and wall panels to the post-frame industry in northern Indiana. This new facility will allow them to expand their services and capabilities to provide their products to the many post frame builders located in this part of the state.
